6 June 2006

As I have previously noted in Legend's recent 2005 Annual Report, Legend reached agreement with Mr Mark Creasy (who controls Legend's major shareholder Yandal Investments Pty Ltd), for the early conversion of its secured convertible note, and the immediate exercise of the resultant options that were attached to the shares issued as a result of its conversion.

I would like to thank shareholders for their support in passing the necessary resolutions at the Company's General Meeting, held on 30 May 2006, which now paves the way for the rights issue the subject of this Prospectus to raise approximately \$6.12 million, which together with the \$5 million from exercise of the Yandal convertible note options, will raise in excess of \$11 million.

Legend now faces a solid future, well funded, with a new and well credentialed management team, and with significant tenement holdings each with production facilities and infrastructure under care and maintenance.

At the end of 2005, Legend had combined mineral resources of over 1 million ounces of gold, albeit uneconomic at current gold prices. It does however provide considerable leverage to both exploration success and/or further increases in the gold price.

With the funding that will come from this underwritten rights issue, Legend's technical team can now turn its focus to the exploration of the highly prospective Gidgee tenement holdings, which cover approximately 2,500km² of the Gum Creek Greenstone Belt, and the Mt Gibson base metal project (zinc-copper).

Legend will now embark on an aggressive exploration program over the next 6 months, with the aim of making new discoveries on the Company's substantial tenement holdings at Gidgee and Mt Gibson.

Michael Atkins
Chairman

4 DETAILS OF THE OFFER

4.1 Introduction

This Prospectus is for the issue of 152,859,440 New Shares plus 152,859,440 Attaching Options on the terms and conditions set out in this Prospectus.

The Rights Issue will raise approximately \$6,120,000 (before the costs of the Issue) and will be underwritten by the Underwriter, conditional on a major shareholder of the Company, Yandal Investments Pty Ltd, converting its Convertible Note early and immediately exercising the Conversion Options in order to raise \$5,000,000. Accordingly, total funds to be raised by the combination of the Issue and conversion of the Convertible Note will be approximately \$11,120,000 before costs.

Yandal has agreed to convert its Convertible Note early in return for 125,000,000 Early Conversion Fee Options exercisable at \$0.04 by 31 July 2008, subject to shareholder approval and subject to performance by the Underwriter of its underwriting obligations. Yandal has requested that 25,000,000 of the Early Conversion Fee Options be issued to Mr Wilson, Mr Ryan and Mr Perring in lieu of issue to Yandal, subject to shareholder approval. Shareholders approved this on 30 May 2006.

4.2 Underwriting

The number of New Shares to which you are entitled is calculated as at the Record Date and is shown on the Application Form which accompanies this Prospectus.

5.4 Assumptions for Unaudited Proforma Consolidated Balance Sheet

The unaudited proforma consolidated Balance Sheet disclosed above has been prepared on the basis that there has been no material movements in the assets and liabilities of the consolidated entity between 31 December 2005 and the close of the entitlements issue other than:

- (a) The consummation of the Rights Issue to raise \$6,114,377.60 and associated costs with the issue incorporating \$414,200 cash and 7,500,000 options valued at approximately \$82,000, utilising the Black Scholes model. In determining the theoretical valuation we have assumed the following:
 - (i) The share price at date of issue is 5.5 cents per share;
 - (ii) The Underwriting Fee Options are exercisable at \$0.04 each;
 - (iii) The price volatility of shares in the Company is 73.41%;
 - (iv) The Underwriting Fee Options are to be exercised by 31 July 2008;
 - (v) The risk free interest rate is 5.5%;
 - (vi) No early exercise by Optionholders; and
 - (vii) A discount rate of 50% to 75% for the non-negotiability of the Underwriting Fee Options and recognition of the level of trade relevant to the number of potential shares to be issued through the exercise of Underwriting Fee Options, and
- (b) The repayment of the loan of \$3 million due on 31 July 2006 and payable to Yandal.

6 RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

The following is a summary of the more significant rights and liabilities attaching to Securities to be issued pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Securities are set out in the Company's Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) Share Capital

All issued Shares rank equally in all respects.

(b) Voting Rights

At a general meeting of the Company, every holder of Shares present in person, by an attorney, representative or proxy has one vote on a show of hands and on a poll, one vote for each Share held, and for every contributing share held, a fraction of a vote equal to the proportion which the amount paid up bears to the total issue price of the contributing share. Where there is an equality of votes, the chairperson has a casting vote.

(c) Dividend Rights

Subject to the rights of holders of shares issued with any special or preferential rights (at present there are none), the profits of the Company which the Directors may from time to time determine to distribute by way of dividend are divisible among the Shareholders in proportion to the Shares held by them respectively, according to the amount paid up (not credited) as paid up on the Shares.

(d) Rights on Winding-Up

Subject to the rights of holders with shares with special rights in a winding-up (at present there are none), on a winding-up of the Company all assets which may be legally distributed amongst the members will be distributed in proportion to the shares held by them respectively, accordingly to the amount paid up or credited as paid up on the share.

(e) Transfer of Shares

Shares in the Company may be transferred by instrument in any form which complies with the Company's constitution, the Corporations Act, ASX Listing Rules and SCH Business Rules.

Shares may be transferred by such means in accordance with ASX Listing Rules and the SCH Business Rules. The Directors may refuse to register a transfer of shares only in those circumstances permitted by the Company's constitution, ASX Listing Rules and SCH Business Rules.

(f) Calls on Shares

Where shares are issued as partly paid, the Directors may make calls upon the holders of those shares to pay the whole of or a portion of the balance of the issue price. If a shareholder fails to pay a call or instalment of a call, then subject to the Corporations Act and ASX Listing Rules, the shares in respect of the call may be forfeited and interest and expenses may be payable in accordance with the Company's constitution, the Corporations Act and ASX Listing Rules or proceedings taken to recover the amount unpaid.

(g) Further Increases in Capital

The allotment and issue of any new shares is under the control of the Directors and, subject to any restrictions on the allotment of shares imposed by the Company's constitution, ASX Listing Rules or the Corporations Act, the Directors may allot, issue or grant options over or otherwise dispose of those shares to such persons, with such rights or restrictions as they may from time to time determine.

(h) Variation of Rights Attaching to Shares

Where shares of different classes are issued, the rights attaching to the shares of a class (unless otherwise provided by their terms of issue) may only be varied by a special resolution passed at a separate general meeting of the holders of those shares of that class, or with the written consent of the holders of at least three quarters of the issued shares of that class.

(i) General Meeting

Each holder of shares will be entitled to receive notice of, and to attend and vote at, general meetings of the Company and to receive notices, accounts and other documents required to be furnished to shareholders under the Company's constitution, the Corporations Act and ASX Listing Rules.

7 RISK FACTORS

7.1 General

An investment in the Company is not risk free and investors should consider the risk factors described below, together with information contained elsewhere in this Prospectus, before deciding whether to apply for Securities. Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and future production activities, as well as on its ability to fund those activities.

7.3 Market conditions

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities and in particular, resources stocks. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

7.4 Security Investments

Applicants should be aware that there are risks associated with any securities investment. Securities listed on the stock market, and in particular securities of mining and exploration companies have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. These factors may materially affect the market price of the securities regardless of the Company's performance.

Mineral exploration and mining are speculative operations that may be hampered by circumstances beyond the control of the Company. Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management.

Exploration in itself is a speculative endeavour, while mining operations can be hampered by force majeure circumstances and cost overruns for unforeseen events.

7.5 Exploration and Evaluation Risks

The success of the Company depends on the delineation of economically minable reserves and resources, access to required development capital, movement in the price of commodities, securing and maintaining title to the Company's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration activities.

Exploration on the Company's existing exploration and mining tenements may be unsuccessful, resulting in a reduction of the value of those tenements, diminution in the cash reserves of the Company and possible relinquishment of the exploration and mining tenements.

7.6 Commodity Price and Exchange Rate Risks

To the extent the Company is involved in mineral production the revenue derived through the sale of commodities may expose the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

7.7 Environmental Risks

The operations and proposed activities of the Company are subject to State and Federal laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company's attempts to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

7.8 Native Title and Title Risks

Interests in tenements in Australia are governed by the respective State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be affected.

The Directors closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

7.9 Joint Venture Parties, Agents and Contractors

The Directors are unable to predict the risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or

managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

7.10 Future Capital Requirements

The Company's activities will require substantial expenditures. There can be no guarantees that the funds raised through the Offer will be sufficient to successfully achieve all the objectives of the Company's overall business strategy. If the Company is unable to use debt or equity to fund expansion after the substantial exhaustion of the net proceeds of the Offer there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional resources on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to shareholders and any debt financing if available may involve restrictive covenants, which limit the Company's operations and business strategy.

The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.

7.11 Potential Acquisitions

As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

7.12 Resource Estimations

Resource estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made. Despite employing qualified professionals to prepare resource estimates, such estimates may nevertheless prove to be inaccurate. Furthermore, resource estimates may change over time as new information becomes available. Should the company encounter mineralisation or geological formations different from those predicted by past drilling, sampling and interpretations, resource estimates may need to be altered in a way that could adversely affect the Company's operations.

7.13 Reliance on Key Personnel

The Company's success depends largely on the core competencies of its directors and management, and their familiarisation with, and ability to operate, in the metals and mining industry and the Company's ability to retain its key executives.

8 ADDITIONAL INFORMATION

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.
