DIRECTORS' REPORT

The Directors submit their report for the half-year ended 30 June 2007.

DIRECTORS

The names and details of the Company's Directors in office during the financial year and until the date of this report are as below. Directors were in office for this entire period unless otherwise stated.

Michael Atkins (Chairman, Non Executive Director)

Mark Wilson (Managing Director)

Robert Perring (Executive Director - Technical) (resigned 30 June 2007)

Dermot Ryan (Non Executive Director)

NATURE OF OPERATIONS AND PRINCIPAL ACTIVITIES

The principal activities during the year of the entities within the consolidated entity were:-

• exploration for gold and base metal (zinc-copper-gold, nickel-copper, zinc-copper and copper-gold) deposits.

RESULTS OF OPERATIONS

The loss of the consolidated entity for the half-year was \$6,445,976 (2006: loss \$1,517,673) after income tax.

REVIEW OF OPERATIONS

This half year saw the culmination of bringing all of Legend's assets into play, ensuring that all Projects are in the hands of well funded good operators thus working for the benefit of shareholders. In summary:

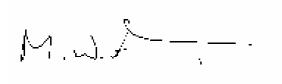

- 1. Legend is exploring the Pilbara and Gum Creek Projects and new drill targets are consistently being discovered. Exploration activity will continue during the September quarter and comprehensive drill programmes will commence once tenements are granted.
- 2. The Mt Gibson Joint Venture will see Oxiana inject up to \$10 million to explore the asset, meaning Legend shareholders have no additional financial risk, but will still benefit from any discoveries with a minimum 25% holding in the JV.
- 3. The Gidgee Gold Project has been sold to Apex, principally for scrip, and shareholders will benefit directly through an in-specie distribution of up to 34 million Apex shares. These Apex shares have increased in value to over \$30 million since the sale agreement. There is provision in the sale agreement for the payment of a contingent consideration of \$5,000,000 payable upon the production of 250,000 oz of gold from the sale tenements. The sale is to be taken up in the second half of the financial year.

The mining and processing operations at the Mt Gibson and Gidgee projects remain on care and maintenance.

AUDITOR INDEPENDENCE AND NON-AUDIT SERVICES

We have received the Declaration of Auditor Independence from Stantons International, the Company's Auditor, this is available for review on page 17.

SIGNED in accordance with a Resolution of the Directors on behalf of the Board

Legend Mining Limited is a company limited by shares incorporated in Australia whose shares are publicly traded on the Australian stock exchange.

The nature of the operations and principal activities of the Group are described in the Directors Report.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The half-year financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the consolidated entity as the full financial report.

The half-year financial report should be read in conjunction with the Annual Financial Report of Legend Mining Limited as at 31 December 2006.

It is also recommended that the half-year financial report be considered together with any public announcements made by Legend Mining Limited and its controlled entities during the half-year ended 30 June 2007 in accordance with the continuance disclosure obligations arising under the Corporations Act 2001.

(a) Basis of preparation

MIUO BSIN | IEUOSIBO 10 =

The half-year consolidated financial report is a general-purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, applicable Australian Accounting Standards including AASB 134 Interim Financial Reporting and other mandatory professional reporting requirements. The half-year report has been prepared on a historical cost basis except for available-for-sale investments which have been measured at fair value.

The financial report is presented in Australian dollars and all values are expressed as whole dollars.

For the purpose of preparing the half-year financial report, the half-year has been treated as a discreet reporting period.

(b) Significant accounting policies

The half-year consolidated financial statements have been prepared using the same accounting policies as used in the annual financial statements for the year ended 31 December 2006.

(c) Basis of consolidation

The half-year consolidated financial statements comprise the financial statements of Legend Mining Limited and its subsidiaries as at 30 June 2007 ('the Group').

(d) Estimates

The preparation of the interim financial report requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this consolidated interim financial report, the significant judgements made by management in applying the consolidated entity's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial report as at and for the year ended 31 December 2006.

NOTE 12: COMMITMENTS

MIJO BSD IBUOSI

(a) Exploration expenditure commitments.

In order to maintain current rights of tenure to exploration tenements, the Company will be required to outlay in 2007 amounts of approximately \$3,205,940 (2006: \$3,958,516) in respect of tenement lease rentals and to meet minimum expenditure requirements of the Department of Industry & Resources. These obligations are expected to be fulfilled in the normal course of operations and have not been provided for in the financial report.

This is the maximum commitment to exploration, to fully meet DOIR requirements. In practice, Legend has routinely applied for and been granted exemptions from meeting these requirements on a tenement by tenement basis. As a result the actual amount required to be expended on exploration is expected to be significantly less than \$3.6 million, while still holding all the tenements in good standing.

There has been no material change of any contingent liabilities during the year.

No matter or circumstances has arisen since the end of the year to the date of this report which has significantly effected, or may significantly effect, the operations of the consolidated entity the results of those operations or the state of affairs of the consolidated entity.

The consolidated entity's activities in Australia are subject to the Native Titles Act and the Department of Environment. Uncertainty associated with Native Title issues may impact on the Company's future plans.

There are no unresolved Native Title issues and the consolidated entity is not aware of any other matters that may impact upon its access to the land that comprises its project areas.
