PROJECTS

Fraser Range: Nickel, Copper
Gold

HIGHLIGHTS

- **Fraser Range ground electromagnetic survey testing six interpreted intrusive mafic/ultramafic bodies completed**
- **Treasury of circa \$11M plus \$6M receivable in July/August 2015**

OVERVIEW

The ground electromagnetic survey over E28/2342 in the Fraser Range was concluded at the Christmas break. Only six of the eleven identified targets were tested due to logistical delays including inclement weather. None of the six targets surveyed identified significant bedrock conductors warranting drill testing. Our plan is to conduct a comprehensive review of the data collected to date, in consultation with our geophysical consultant, as a guide to future work.

Meanwhile we continue to be active in the project acquisition space.

Fraser Range

1. FRASER RANGE PROJECT – (100% Legend)

The Fraser Range Project covers 409km², comprising one granted exploration licence (E28/2342) and two exploration licence applications (E28/2408 and E28/2415). Tenement E28/2342 is located 220km northeast of Nova and 100km south of Tropicana in the Fraser Range District, see Figure 1. It is considered prospective for Nova style nickel-copper and Tropicana style structurally controlled gold mineralisation.

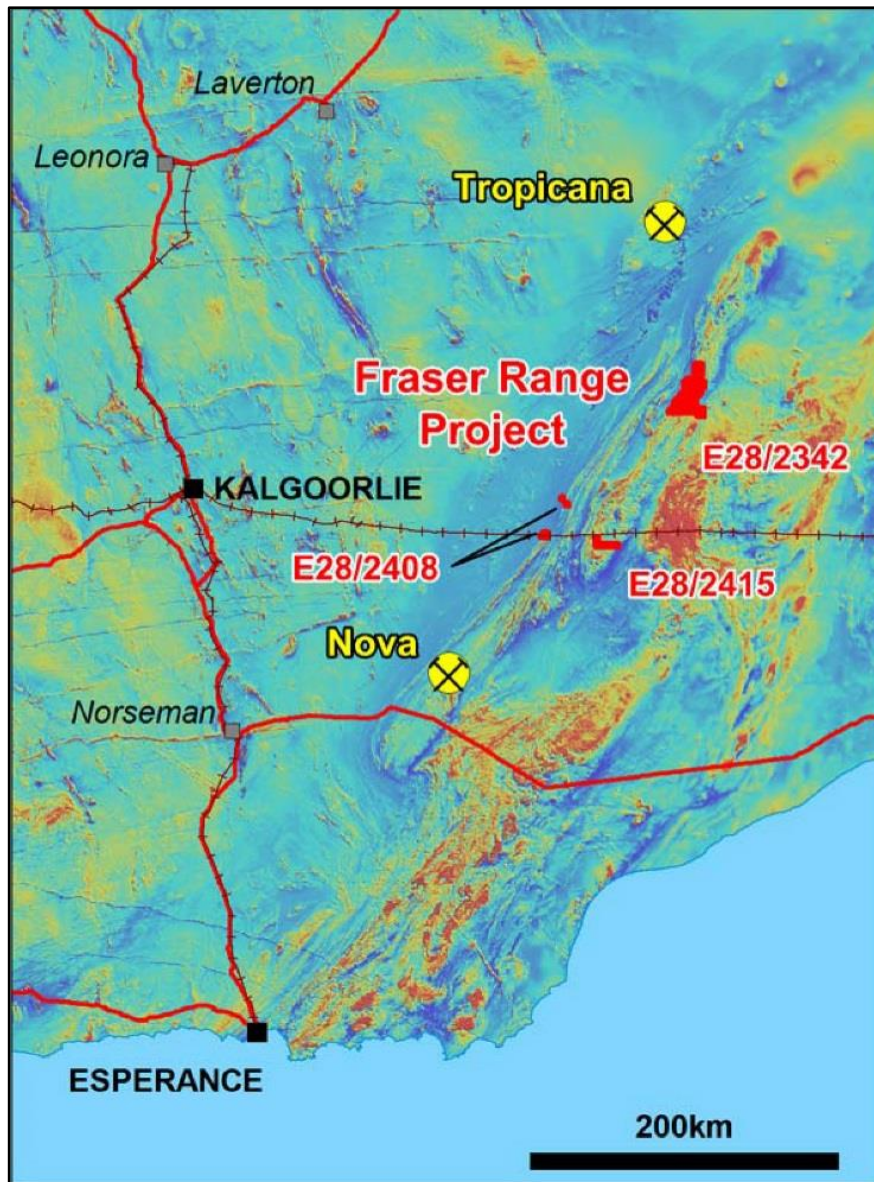

Figure 1: Project Location on Regional Aeromagnetic Image

Legend’s extensive moving loop electromagnetic (“MLEM”) survey over E28/2342 was completed during the quarter. The survey was designed to test for possible conductors associated with magnetic features interpreted to relate to mafic/ultramafic intrusives.

A total of six targets were tested without defining a significant bedrock conductor, see Figure 2. The targets tested had a range of magnetic signature including two large complex magnetic features in the south and several smaller more discrete features in the north. The survey encountered large areas with relatively thick conductive cover, highlighting the ineffectiveness of surficial sampling and the need for remote geophysical exploration methods.

Legend will now review all exploration data, including the knowledge gained from the EM survey in order to plan follow up exploration programmes for 2015.

2. CORPORATE

As announced to the ASX, 9 million unlisted Legend options exercisable at \$0.053 expired unexercised on 16 December 2014.

Competent Person Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Derek Waterfield, a Member of the Australian Institute of Geoscientists and a full time employee of Legend Mining Limited. Mr Waterfield has sufficient experience that is relevant to the styles of mineralisation and types of deposit under consideration, and to the activity being undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves” (JORC Code). Mr Waterfield consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
